## PROFESSIONAL SUMMARY

Results-oriented self-driven Junior Web Developer with deep knowledge in state-of-the-art web development technologies. Proficient in front-end development using React, Tailwind CSS, and DaisyUI, experienced in implementing backend functionality with native MongoDB. Able to transform Figma designs into responsive and visually appealing websites. Passionate about using my skills to build impactful web applications, aspiring to grow as a data scientist by integrating analytical problem solving into development. Eager to learn and contribute to meaningful projects in the tech industry.

## SKILLS

### Technical Skills

Frontend: React js, Javascript, Tailwind css

Backend: Node js, Express js

Database: Mongoddb

Tools: Github, Figma, Vs code

### Soft Skills

Active Listening, Quick learning, Teamwork

## PROJECTS

### Visas-(Online Visa Booking Platform)

Oct 2024 to 2024

Visas is a user-friendly online platform designed to simplify the visa booking process. It allows users to search for visa services, check eligibility, and book appointments seamlessly. The platform ensures a hassle-free experience with streamlined documentation handling and real-time status updates, making visa applications faster and more efficient..

**Tech Stack:** React.js, Node.js, Express.js, MongoDB
